6. A brief Description of the Corpus:

This corpus contains speech from 3,000 male speakers aged 18-23, each of whom was required to utter 1) a brief introduction (personal information) and 2) 40 Chinese sentences (as listed in the

following table) in the given order. All utterances were required to be made twice, speaking clearly and naturally without any attempt to disguise the voice. For each speaker, the first time the utterance was made it was recorded through a GSM mobile phone and the second time it was recorded through a landline telephone. Only the first 70 seconds of each utterance were recorded. **Note:** *This corpus is a subset of CCC-VPR2C2005-6000.*
